SHORT COURSE IN APPLIED STATISTICS COURSE FOR BUSINESS AND INDUSTRY PROFESSIONALS

INTRODUCTION

Data analysis skills are essential for the modern day career professionals in any field of endeavor. Good statistical knowledge helps to set up experiments and observational studies to effectively answer relevant and critical questions. This course is designed for both the intermediate looking for a refresher course that will strengthen their general and applied statistics skills and for the advanced who seeks to do more in his required profession. Through the completion of interactive exercises and activities, participants will complement expert lectures by putting proven techniques into practice.

COURSE OBJECTIVE

To uncover the art and science of applied statistics in data analysis and statistical software manipulation. It is designed to extend participants knowledge and skill on a range of statistical techniques useful within intermediate and advanced applications.

TARGET GROUP

- All career professionals and academicians.
- Researchers working within general businesses (e.g. manufacturing & service delivery etc).
- Government organizations and research institutions.
- Postgraduate students (PhD, Masters, etc)
